SPRIET ASSOCIATES was established in 1961 by Andrew M. Spriet, P. Eng., OAA. The firm provides professional engineering and architectural services to municipal and provincial governments as well as to the industrial and commercial sectors.

With five decades of corporate history, the company's success can be attributed to the excellent client service provided, combining experience and project innovation. There are approximately 26 people in the Spriet Associates London office. Professional qualifications include eight registered engineers. Two engineers are also qualified as architects.

SPRIET ASSOCIATES OFFICE, LONDON

ARCHITECTURAL SERVICES

ARCHITECTURE has been an important department at Spriet Associates since the early 1960's. Building projects range from minor alterations to substantial buildings for commercial, industrial, municipal and institutional clients. The firm provides complete project design services, from preliminary design studies to cost estimates, working drawings, specifications and construction supervision.

STRUCTURAL ENGINEERING

STRUCTURAL ENGINEERING design and analysis services are provided for buildings, bridges and a range of special projects such as retaining walls, signs and sheet piling for marinas and waterways. The firm also has a broad range of experience in completing structural safety appraisals and studies to meet government requirements and certification procedures.

MUNICIPAL ENGINEERING SERVICES

MUNICIPALITIES have a continuing responsibility to build and maintain public services. Our success is based on our ability to meet objectives within municipal budget constraints. Projects include design and construction supervision for urban and rural roads, water distribution systems, water pumping and storage facilities, sanitary sewers, storm sewers and stormwater management systems.

DRAINAGE ENGINEERING

MUNICIPAL DRAINAGE is a complex subject with many different issues to be resolved. We provide ongoing assistance and support for our municipal clients as part of our consulting services. Spriet Associates have been preparing municipal drainage reports since 1961. Drainage engineering services are presently being provided to more than 35 Ontario municipalities.

DEVELOPMENT ENGINEERING SERVICES

LAND DEVELOPMENT has become increasingly more structured. Projects must conform to a wide range of government requirements and standards. Spriet Associates provides comprehensive engineering services for subdivision and site development. Successful projects include residential and industrial subdivisions, apartments, offices, retail commercial developments, factories and recreation projects.
